

Reworld™ Expands Sustainable Waste Solutions in the Eastern United States with the Acquisition of R.E.D. Technologies and REDTECH Rail

MORRISTOWN, N.J., March 4, 2025 /PRNewswire/ -- Reworld™, a leader in sustainable waste solutions, announces the acquisition of R.E.D. Technologies, LLC ("REDTECH"), a privately held profiled waste and field remediation company located in Portland, Connecticut. This acquisition strengthens the operational and logistics capabilities of Reworld™ across the Northeastern United States.

"By combining REDTECH's strategic location and proven expertise with existing Reworld service lines, we are strengthening our ability to offer scalable, innovative waste solutions across the Northeastern United States," said Paul Stauder, EVP Business Development and M&A. "Together, we are poised to deliver greater value to our customers and communities while advancing the transition to a more sustainable future."

REDTECH operates a state-of-the-art profiled waste transfer station with on-site rail transloading capabilities strategically positioned to serve both the public and private sectors. The company handles over 300,000 tons of material annually, including contaminated soils, asbestos, PCBs and containerized hazardous and non-hazardous waste streams. This transaction provides Reworld with enhanced capabilities in hazardous and non-hazardous waste logistics, supported by REDTECH's fleet of 36 railcars and 100+ vehicles and pieces of equipment.

"Joining Reworld is an exciting step for our team and the communities we serve," said Adam Westhaver, Vice President of R.E.D. Technologies. "By combining our expertise and services with Reworld™, we will enhance our ability to deliver innovative and sustainable waste management solutions."

As part of the integration, Reworld will leverage REDTECH's infrastructure to expand profiled waste services at its nearby Thermomechanical Treatment Facilities (TTFs) and Material Processing Facilities (MPFs), which will bolster its ReDirect360 (zero waste-to-landfill) and ReMove (waste logistics) services.

This acquisition is part of a strategic vision by Reworld to reimagine waste through resource recovery, recycling and reuse. By incorporating REDTECH's capabilities, Reworld™ continues to lead the industry in sustainable waste solutions, addressing the growing need for innovative, efficient and environmentally responsible waste solutions.

About Reworld™

Reworld is a leader in sustainable waste solutions, providing innovative and environmentally responsible services to a global community. Reworld™ is committed to advancing zero waste initiatives and supporting sustainability goals through state-of-the-art technologies that reimagine, reduce, reuse, recycle, recover, and renew.
